Pallavi Model School , Bowenpally — Hyderabad, India
SSC; Percentage/CGPA: 88 — *July 2014 - June 2018*

INTERNSHIP EXPERIENCE

LW3 Pvt Limited — Remote
Front End Developer (Full-time) — *May 2024 - Ongoing*

- **Implemented a blockchain-based product authentication passport UI on an all-compatible web application.** :
- Developed a Web Application for the User to Validate the Authenticity of a Product
- Utilization of frameworks such as React, Redux and Express.js, along with tools like Vite, npm, Figma, Tailwind CSS, and Git. The project was built entirely using TypeScript, enabling fast-paced integration and the implementation of an easily accessible UI.

PROJECTS

Portfolio Website — Github
Completed — *June 2023 - January 2024*

- Developed a dynamic portfolio website emphasizing user-centric design and seamless navigation for an enhanced visitor experience.
- Implemented responsive design principles using HTML, CSS, and JavaScript to ensure optimal display across various devices and screen sizes.
- Incorporated SEO best practices to optimize website visibility and search engine rankings, increasing discoverability and reach. Deployed on Netlify.

MERN E-Commerce School Uniform Website — Github
Completed — *March 2024 - April 2024*

- Developed a comprehensive e-commerce website focusing on school uniforms for popular schools in Silchar using the MERN stack. Emphasized user-centric design and seamless navigation for an enhanced shopping experience.
- Implemented efficient data handling with MongoDB, responsive and dynamic interfaces with React, robust server-side functionality with Express.js, and fast-paced integration using Node.js.
- Implemented efficient data handling with MongoDB, hosted on Google Cloud Platform (GCP) for robust scalability and reliability.
- Integrated tools like Vite, npm, Figma, Tailwind CSS, and Git to ensure a streamlined development process and a polished final product. Front end deployed on Netlify and backend server deployed on Render.

Sales Forecasting Project — Github
Completed — *Dec 2023 - Feb 2024*

- This project focuses on sales forecasting using machine learning techniques. Leveraging datasets containing historical sales data, the project employs regression analysis to predict future sales trends.
- The project employs Python-based tools including pandas, numpy, seaborn, and scikit-learn for data analysis, visualization, and machine learning, facilitating accurate sales forecasting through regression analysis within the Jupyter Notebook environment.
